Print Test Page

-Some models of printers will need to have the “fit to page” box checked in the printer settings in order to print the business cards in the correct size.

-Other models of printers will require the opposite. To NOT check the box that says “fit to page” in the print settings.

So we recommend printing this test page prior to printing your business cards and trying both settings so that you will know which print setting to use so that your cards print in the correct size. Correct size is 3.5 inches x 2 inches for each printed card. That is the United States standard business card size.
